Description

The equipment is a high-tech equipment integrating light, electricity, gas and machine.
It is suitable for automatic packing of capsule and tablet formed by blister, blister plate with aluminum plastic package and similar articles.
Its working process is the transmission of drug plates or articles (one or more plates can be adjusted at a time); the transmission of drug instructions (automatic folding of 1-4 folds); the automatic formation and transmission of cartons, which load the folded instructions into the cartons at the same time; and automatically complete the complex packaging processes such as batch printing, carton sealing at both ends. The machine can be connected with blister packaging machine to form a packaging line (heating glue melting machine)
