

3000 bottles/hour Rotary Punching Control Machine For Washing And Controlling

Özellikler :

Marka Ad?	Hanyi
Model Numaras?	HY-56
Üretim Yeri	Shanghai, China
Minimum Sipari? Miktar?	1unit
Ödeme ?artlar?	T/T
Teslimat Detay?	5 days - 20 days
Paketleme Detaylar?	Standard export wooden case or carton box.

Detayl? Tan?m :

HY-56 Type Rotary Punching Control Machine

Product description:

A. The machine adopts high-quality 304 stainless steel precision casting, and the original sliding is changed to rolling, which effectively increases the reliability.

B. The chain composed of chain sleeves of this machine is passed into the water retaining cover, and it is flushed inside and outside with high pressure water.

C. This machine and filling machine, capping machine, sealing machine, inspection machine, labeling machine, conveyor, etc. can form a packaging production line.

Features:

The rotary washing and washing control machine is suitable for washing and controlling a variety of special-shaped bottles. It has many washing times and long bottle control time, which meets the national food hygiene standards.

Specifications:
