

High Efficiency Medicine, Food Plastic Bottle Automatic Capping Machine 220V/380V

Spesifikasi :

Nama Brand	Hanyi
Tempat Asal	Shanghai, China
Min.Jumlah Pemesanan	1 unit
Syarat Pembayaran	T/T
Detail Pengiriman	5 days - 20 days
Detail Packing	Standard export wooden case or carton box.

Detail Pengenalan :

Automatic Capping Machine

The picture is for reference only.

Description?

The automatic capping machine is a product that integrates the characteristics of domestic and foreign capping machines, learns from each other's strengths, and carries out in-depth development and perfection. The automatic capping machine adopts the friction type capping type, which is convenient to adjust. The capping speed can be adjusted arbitrarily according to the user's output.

It is more efficient than the claw capping machine. This machine has a reasonable design, compact structure, high capping efficiency, no slipping and breakage of the bottle cap, no fraying of the bottle body, stability and reliability, long service life, simple operation and convenient maintenance. The products are in full compliance with the requirements of GMP regulations. The automatic capping machine is widely used in medicine, food, chemical and other industries.

Applicable specifications	2-1000ml
Rotating (rolling) cover rate	99%
Power supply	220V/50Hz
Power Consumption	1.2 kw
Applicable specifications for machine net weight	400 kg
Dimensions	1000*900*1700mm
Production capacity	1000-2500/h
