#### Connecting Multiple Trains

#### Description

The equipment is a customized special automatic packing machine.

The front end is connected with multiple row machines or multiple single row machines (either powder or liquid ?lling machines).

The equipment is an automatic feeding system integrating side feeding, counting and handling. After counting is completed, it is automatically imported into the box loading machine. A series of mechanical actions can automatically open the box, push the material into the box, seal the box and output the ?nished product. The back end can also be connected to code printing/spraying machine, inspection machine, gold inspection machine, packing machine and other equipment, to achieve automatic intelligent production line.
